

# CP 0010

## Sump Pump

The Chicago Pneumatic CP 0010 sump pump is designed for high performance and durability, making it a reliable solution for removing water from trenches, ditches, manholes, industrial sumps, and excavations. Built for demanding jobsite conditions, it delivers dependable operation across a wide range of dewatering applications.

The CP 0010 is capable of pumping water down to within 7/8 in of the base, helping ensure efficient water removal in confined or low-level areas.

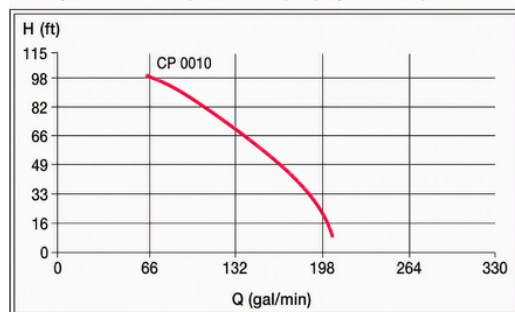

### Specifications

Air consumption at 90 psi: 100 cfm

| Part Number                      | 8900004031 |
|----------------------------------|------------|
| Model                            | CP 0010    |
| Net weight (lbs)                 | 33         |
| Min water depth (in)             | 7/8        |
| Overall height (in)              | 17 1/2     |
| Height w/o valve (in)            | 13 3/4     |
| Water discharge (NPT-in)         | 2          |
| Min opening pump will enter (in) | 8 1/4 x 9  |
| Air inlet thread size (in)       | 3/4        |
| Recommended hose size (in)       | 3/4        |
| Motor (hp)                       | 3          |

### Pump Curve Chart

The diagram is valid at 87 psi and when pumping from base plate level.

H: Head feet

Q: Flow imp gal/min

**NOTICE** The capacity of the pump will change and the chart above will not be accurate if a lower air pressure than the recommended is used, or if the pumped liquid has a different viscosity than water.
